

SUDARSHAN PATIL

Frontend Developer | React Developer | UI Developer

Pune, Maharashtra | +917875412671 | sudarshanpatil.dev@gmail.com | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

Frontend Developer with **2+ years of hands-on experience** building responsive, scalable web applications using React.js, JavaScript, and modern CSS. Skilled in developing reusable component libraries, integrating RESTful APIs, and managing complex client-side state with Redux Toolkit. Prior experience in web-based application development with dynamic conditional logic, real-time validation, and large-scale user flows adds a strong foundation in writing reliable, user-focused code. Comfortable contributing across the full stack with Node.js, Express.js, and MongoDB when needed.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, GSAP, Responsive Design

Backend: Node.js, Express.js, MongoDB, REST APIs, JWT Authentication

State Management: Redux Toolkit, Context API, Custom Hooks

Build Tools & Workflow: Vite, Webpack, Git, GitHub, Jira

Tools & Design: VS Code, Postman, Figma (basic), Chrome DevTools, Decipher, Confirmit

PROFESSIONAL EXPERIENCE

Web Crypt Technology

Pune, India

Frontend Developer

Feb 2024 – Present

- Built and maintained feature modules across a web application using React.js - covering dynamic listing pages, multi-step user flows, and dashboard UI with clean component architecture
- Developed a reusable component library used consistently across the application, reducing duplication and keeping UI patterns predictable and maintainable
- Integrated REST APIs for dynamic content, form operations, and user data - handling loading states, error boundaries, and async edge cases to ensure production stability
- Managed client-side state with Redux Toolkit; structured slices for user session, UI state, and search/filter functionality to keep application state scalable
- Built complex multi-step form flows with real-time validation and conditional field logic using React Hook Form and custom hooks
- Applied React.memo, lazy loading, and route-based code splitting to reduce initial load time and improve rendering on data-heavy pages
- Contributed to backend CRUD endpoints in Node.js and Express.js, enabling self-sufficient feature delivery end-to-end
- Collaborated on Git and GitHub for daily version control - branching per feature, raising PRs, and reviewing teammates' code

Course5 Intelligence

Navi Mumbai, India

Junior Survey Programmer

May 2022 – Dec 2023

- Scripted and contributed over 100+ web-based surveys using Decipher tool with XML-based configuration - setting up question flow, display logic, and survey structure per client research requirements
- Implemented quota management, skip patterns, speeder, and straight-lining checks to control respondent routing and ensure clean data collection
- Collaborated with QA and data validation teams to verify survey logic before go-live, maintaining 99%+ data integrity across high-volume (10,000+ respondent) projects
- Managed full survey lifecycle: scripting, QA testing, deployment, live monitoring, and client support for US & UK market research clients.

PROJECTS

Nirmalram Construction - Full-Stack Business Website (Client Project)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Built full-stack business website with admin dashboard for managing projects, reviews, and media content - reduced client's manual content update effort by 100%
- Developed responsive frontend with React.js and Tailwind CSS ensuring consistent UI across all devices; integrated REST APIs for dynamic content rendering
- Designed MongoDB schema for efficient project and media storage; implemented inquiry forms and service pages increasing user engagement

Advanced Trading Platform | [Live Link](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Chart.js

- Engineered real-time trading dashboard with API-driven market data, Chart.js visualizations, and optimized high-frequency UI rendering using memoization
- Implemented JWT-based authentication, secure order execution workflows, and portfolio tracking with efficient MongoDB data handling

Interactive Developer Portfolio | [Live Link](#)

Tech Stack: React.js, TypeScript, Tailwind CSS, GSAP, Locomotive Scroll

- Designed and developed a high-performance, animation-rich portfolio with smooth scrolling and modern UI
- Implemented reusable components and optimized performance for fast loading across devices

EDUCATION

B.Tech in Electronics & Telecommunication — CGPA: 7.67/10

Jul 2017 – Jun 2021

R. C. Patel Institute of Technology, DBATU, India

CERTIFICATIONS

MERN Stack Web Development - Full-stack apps with React, Node.js, MongoDB; JWT authentication & API integration

Full Stack Development - Scalable apps with React, Node.js, Express; system design basics & backend architecture
